## Prefață

Complexitatea sistemelor de informare actuale impune cadrelor didactice, cercetătorilor, studenților și de asemenea bibliotecarilor acumularea de noi cunoștințe și abilități în utilizarea surselor de informare.

Bibliotecarii trebuie să devină experți în știința informării. Pentru realizarea acestei misiuni sunt necesare cercetări științifice fundamentale și aplicative în domeniul științelor informării. Pentru a oferi utilizatorilor informații relevante bibliotecarul navighează în rețelele informatice și evaluează resursele electronice.

Prezervarea digitală este o problemă vitală pentru societatea informațională, unde cantitatea informației crește rapid și unde conținutul devine din ce în ce mai dinamic. Sarcina de bază în digitizarea colecțiilor revine bibliotecilor, în special celor academice.

Bibliotecile digitale organizează colecții cu conținut digital și le fac disponibile pentru public. Colecțiile pot conține atât materiale care au fost digitizate, cum ar fi copiile digitale ale publicațiilor "fizice", cât și materiale bazate pe informații produse original în format digital (digital-născute).

Multe biblioteci academice se implică activ în crearea Repozitelor Academice (Academic Repositories). Acestea conțin publicații (cărți, manuale, lucrări, teze ș.a), care au fost convertite din mediul fizic în cel digital sau sunt într-un format digital – născut.

Explorarea rațională a rezultatelor cercetării științifice depinde în primul rând de accesul la aceste rezultate.

Acest principiu a determinat apariția în mediile de cercetare a resurselor cu acces deschis (*Open Access Resource/ Open Archives*) în scopul de a promova accesul liber și gratuit la literatura științifică mondială.

Nucleul principal în sistemul comunicațiilor științifice este revista științifică. În ultimii ani bibliotecile academice sunt nevoite să reducă considerabil numărul revistelor abonate din cauza micșorării bugetului bibliotecilor, cât și creșterii numărului revistelor specializate și a prețurilor acestora.

Multe edituri oferă acces la reviste cu text integral cu un indice de impact ridicat. Editura SPRINGER la nivel mondial este a doua mare editură științifică, specializată mai ales pe domeniile tehnic și medical. Cunoaștere, informație și calitate sunt cele trei lucruri care modelează activitatea editurii SPRINGER. Marea parte din revistele electronice oferite de această editură sunt contra plată.

La moment UTM beneficiază de accesul liber la multe din revistele platformei SpringerLink. Publicația curentă vă oferă o serie de referințe la reviste electronice din domeniul tehnic, economic și social, dar accesul la ele poate fi realizat numai din interiorul Universității.

Prin serviciul Online First™ aveți acces la numerele revistelor cu mult înainte de a apărea în varianta tipărită, astfel beneficiind de informațiile importante mult mai rapid.

Puteți găsi repozitele multor țări în Registrul Repozitelor Electronice Deschise (*ROAR – Registry of Open Access Repositories*) unde la moment sunt înregistrate diverse ramuri ale științei și domenii de activitate practică.

Un alt registru internațional al repozitelor electronice deschise este *OpenDOAR – Directory of Open Access Repositories*.

*Directory of open access journals (DOAJ)* conține reviste electronice full-text din toate domeniile în mai multe limbi, inclusiv în limba română.

Programul *NSDL (National Science Digital Library)* început în anul 2000, are în prezent peste 200 de proiecte finanțate pentru crearea colecțiilor digitale și servicii lor publice.

*Hindawi Publishing Corporation* este o editura comerciala care publică în mare parte reviste academice. Multe din aceste reviste sunt cu Acces Deschis.

Multe resurse cu Acces Deschis pentru comunitatea științifică pot fi găsite pe portalul *WorldWideScience (The Global Science Gateway)*. Acest portal înglobează resurse informaționale științifice din întreaga lume.

Toate referințele la revistele electronice din această publicație la moment sunt cu Acces Deschis, dar politica de acces ar putea să fie schimbată în timp de către furnizori.

Majoritatea resurselor electronice din rețeaua Internet sunt preponderent în limba engleză. Paralel cu extinderea Web-ului s-au dezvoltat și sistemele de traduceri automate. În categoria Dicționare/Translatoare găsiți o serie de instrumente care facilitează înțelegerea textelor.

Aveți posibilitatea să consultați online cataloagele electronice ale bibliotecilor din Republică.

Referințele resurselor electronice sunt clasificate pe domenii. Va urma adăugarea de noi domenii și noi resurse actuale. Modificările ce vor interveni le puteți urmări pe site-ul bibliotecii UTM <http://www.library.utm.md> în opțiunea Biblioteca Electronică.

Și după spusele lui Anton Pann - „Științele sunt uși, iar cheile lor sunt cercetările”. Acele uși așteaptă să fie deschise și de Dv., stimați studenți și tineri cercetători.

Tuturor va urăm explorări fructuoase în domeniul științei și să găsiți cheile potrivite la acele uși.
