

În perioada 2014 – 2016 Biblioteca Tehnico-Științifică UTM participă ca partener în cadrul Proiectului 543929 – TEMPUS – 1 – 2013 -1 LT-TEMPUS – JPGR

« Modern Information Services for improvement Study Quality (MISISQ) »

Proiectul prevede achiziționarea unui SOFT integrat de bibliotecă; crearea Repozitoriilor Instituționale; amplificarea nivelului Culturii Informației pentru studenți și cercetători; crearea Bibliotecii Virtuale pentru comunitatea academică din Moldova.

.....

The main goal is to create integrated e-library and improve information services for quality education in Moldova universities.

Specific objectives:

1. To create information infrastructure for Moldova university libraries and implement Library Information System for creation and sharing union e. catalogue, acquisition and circulation of documents, searching and access to information resources for local and remote users;
2. To create institutional e-repositories for study and research output of Moldova universities;
3. To implement new information services for students and teachers that will support study process at universities;
4. To arise information literacy among academic community that ensures effective usage of information resources and scholar communication internationally;
5. To train trainers who will deliver educational courses on information literacy for students under university curriculum or freely available.
